

Content gate lab notes

Ten checks against a saved Peec URL report. No live Peec call. Eight rows are in the Supabase pages table. Two broken copies stay in the lab only, because the table requires a body and a matching schema.

What the gate did

Locale	Path	Status	Reason
de	/de/steuern-berlin	published	url, schema, and Peec agree
en	/en/taxes-berlin	blocked	url is absent from the Peec report
de	/de/elster-frist	published	url, schema, and Peec agree
en	/en/filing-deadline	blocked	citation_rate is missing
de	/de/homeoffice	published	url, schema, and Peec agree
en	/en/home-office	published	url, schema, and Peec agree
de	/de/kirchensteuer	blocked	url is absent from the Peec report
en	/en/moving-costs	published	url, schema, and Peec agree
de	/de/werbungskosten	blocked	body is empty
de	/de/umzugskosten	blocked	json_ld.url does not match the page url

What the runs showed

- A URL in the report, with a body and a matching schema, publishes. That includes a rate of 0.05 and a rate of 0.0. A low rate is not a block.
- /en/taxes-berlin and /de/kirchensteuer are absent from the report, so they block.
- /en/filing-deadline is in the report, but citation_rate is null, so it blocks.
- An empty body blocks before Peec is consulted.
- A schema URL that does not match the page URL blocks before Peec is consulted.

Score: 5 published, 5 blocked. Re-run with `python experiments.py`.
